Grid-Scale Battery Storage: Cost Trends 2026

Boreal Research Partners - Energy Systems Brief, September 2026

Turnkey capex for 4-hour lithium-iron-phosphate systems settled near
USD 248 per kWh in Q2 2026, down 19% year over year.
Levelised cost of storage for daily-cycling utility projects ranges
from USD 92 to 131 per MWh, depending on the augmentation schedule.
Sources: twelve disclosed EPC contracts; three developer interviews.
